

I. GENERAL PROVISIONS

MINISTRY OF THE INTERIOR

1773 *Resolution of January 24, 2024, of the Directorate General of Traffic, establishing special traffic regulation measures during the year 2024.*

For reasons of road safety, mobility and traffic flow, in accordance with the dates on which massive movements of vehicles are expected, as well as the intrinsic danger of the load of certain vehicles, special traffic regulation measures are established, in accordance with the provisions of articles 5, paragraphs k), m) and n), 12 and 18 of the revised text of the Law on Traffic, Circulation of Motor Vehicles and Road Safety, approved by Royal Legislative Decree 6/2015, of October 30, as well as Articles 37 and 39 of the General Traffic Regulations, approved by Royal Decree 1428/2003, of November 21, and Article 14 of the General Vehicle Regulations, approved by Royal Decree 2822/1998, of December 23, and of the corresponding report issued by the High Council on Traffic, Road Safety and Sustainable Mobility, in accordance with the provisions of Article 8.5 paragraph d) of the rewritten text of the aforementioned Law on Traffic, Circulation of Motor Vehicles and Road Safety.

By virtue thereof, and in accordance with the competent bodies of the Ministries of the Interior and of Transport, Mobility and Urban Agenda, for the interurban public roads and crossings referred to in paragraphs i) and k) of article 5 of the aforementioned consolidated text, the Director General of Traffic resolves as follows:

First. *Circulation restrictions.*

The following traffic restrictions are established, all of them without prejudice to the temporary restrictions that, if applicable, may be imposed:

A) Sporting events, cycling marches and other events:

In accordance with the provisions of Article 55 and Annex II of the General Traffic Regulations, no sporting event, competitive or otherwise, or any other event that may affect the flow of traffic or road safety, shall be authorized or reported favourably, especially those that imply an exceptional use of the road and require escort by the Surveillance Forces of the Traffic Grouping of the Civil Guard, during the days and hours indicated in Annex I of this resolution, as well as those that use highways, except in their essential connecting sections.

Exempted from the above are federated sporting events that score for official international, national, or regional competitions with the consideration of championships, cups or similar to these, provided they are scheduled in the sports calendar of the Directorate General of Traffic for those dates and places.

Likewise, in relation to the provisions of this section A), exceptionally, the Director General of Traffic, and if applicable, by delegation, the Provincial Traffic Chiefs or the Deputy Director General of Mobility and Technology Management, depending on the events whose itinerary runs entirely in an autonomous community or not, may authorize the celebration or report favourably to allow its celebration, provided that traffic safety can be guaranteed and there is no significant alteration in the flow of planned trips at the provincial, autonomous community or national level.

The Traffic Management Centers of the affected area will be in charge of determining the degree of importance of such fluidity of travel.

The authorization or exceptionally favourable report of sporting events will require, in any case, that they are foreseen in the sports calendar of the General Directorate of Traffic for the dates on which there are restrictions. Non-sporting events may also be reported favourably on an exceptional basis despite the fact that there is an alteration in the flow of traffic if there are reasons of social or traditional relevance that justify the public interest thereof and the impairment thereof, provided that the safety of all road users is guaranteed.

In any case, they must be events that do not require escort from the Guardia Civil's Traffic Patrol Forces, or only a very small number of escorts.

B) Goods transport vehicles:

It is forbidden to circulate on the roads monitored by the Autonomous Body of the Central Traffic Headquarters (Jefatura Central de Tráfico):

B.1 General merchandise:

To vehicles or combinations of vehicles with a maximum authorized mass (MMA) of more than 7,500 kilograms or maximum combination mass (MMC):

B.1.1 By calendar and track sections:

In the sections and during the days and hours indicated in Annex II of this resolution.

B.1.2 Exemptions:

The following vehicles and vehicle combinations of any maximum authorized mass are exempted from this prohibition:

- Transport of live cattle.
- Transport of perishable goods, understood as those listed in Annex 3 of the International Agreement on the Carriage of Perishable Goods (ATP) as well as fresh fruits and vegetables, in vehicles that meet the definitions and standards expressed in Annex 1 of the ATP. In any case, the perishable goods must account for at least half of the payload capacity of the vehicle or occupy half of the payload volume of the vehicle.
- Vehicles of Sociedad Estatal Correos y Telégrafos, Sociedad Anónima, for the transport of postal items within the scope of the universal postal service, from Monday to Friday, both included.
- During the winter road campaign period, those transporting de-icing to ensure the correct maintenance of the roads.
- Public roadside rescue vehicles.

B.2 Dangerous goods.

To vehicles that must carry the orange danger sign panels required by the Agreement concerning the International Carriage of Dangerous Goods by Road (ADR):

B.2.1 By calendar and track sections:

- In the sections and during the days and hours indicated in Annex V (section 1.º Common Restrictions, and section 2.º Specific Restrictions heading A) of this resolution, and in addition, when the vehicle exceeds 7,500 kilograms.

of maximum authorized mass (MMA) or maximum combination mass (MMC), those indicated in Annex II.

B.2.2 By itinerary:

Pursuant to Article 5 of Royal Decree 97/2014, of February 14, regulating the transport operations of dangerous goods by road in Spanish territory, the routes to be used by vehicles for the transport of dangerous goods shall be:

a) When moving for distribution and delivery of dangerous goods to their final recipients or consumers:

The most suitable route shall be used, both in terms of road safety and traffic flow, traveling the minimum distance possible along conventional roads to the point of delivery of the goods. Inexcusably, the ring roads, bypasses or ring roads outside the towns, if any, must be used, and in the event of there being more than one, they will circulate through the one furthest outside the town, being able to enter the urban center only to carry out loading and unloading operations, and always through the access closest to the delivery point, except for justified reasons of force majeure.

b) In other types of displacements:

If the points of origin and destination of the movement are included within the RIMP - Red de Itinerarios para Mercancías Peligrosas (Dangerous Goods Route Network)- listed in Annex IV of this resolution, the vehicles transporting them must use them on their route. If one of these points, or both, are outside the RIMP, the movements must be made on those roads that allow access to the network by the nearest entrance or exit in the direction of travel, in order to ensure that the route on single carriageway roads is as short as possible.

Transit on roads other than those indicated herein shall require that the itinerary does not pass through crossings or that it does so through those of lesser danger -in accordance with the intensity, classification and distribution of traffic, the size of the urban nucleus, the urban configuration, and the layout and regulation of the same, and in addition, prior communication with at least twenty-four hours in advance to the Traffic Management Center of the affected area, who, in coordination with the Sector of the Traffic Grouping of the Civil Guard, will confirm whether the use of the new route is appropriate.

Likewise, it shall be allowed to leave the RIMP by the nearest exit, in those trips whose destination or origin is the driver's usual residence; to take daily or weekly breaks; to carry out repair operations, vehicle maintenance or to access the base of the transport company, provided that, in any case, the safety and security conditions established in the ADR are met.

c) The provisions of the preceding paragraphs shall not apply when the transportation of this class of goods is carried out in accordance with any of the exemptions included in the ADR due to the cargo, quantity or type of transportation.

B.2.3 Exemptions:

Vehicles transporting the materials referred to in Annex III of this resolution are exempted from the prohibitions established in sections B.2.1 and B.2.2, under the conditions determined therein and without prejudice to compliance with any other restriction that may apply to them.

B.3 Special vehicles and vehicles that require additional authorization for circulation when exceeding, due to their technical characteristics or because of the indivisible load transported, the values of the maximum permitted masses or dimensions.

B.3.1 By calendar and track sections:

– In the sections and during the days and hours indicated in Annex II and Annex V (section 1.º Common restrictions, and section 2.º Specific restrictions item B) of this resolution.

B.3.2 Exemptions:

– This restriction shall not apply to vehicles which, due to their urgent use in fire prevention and extinguishing, environmental protection, maintenance of road conditions and rescue of human lives, must unavoidably circulate during the aforementioned restricted hours. For this purpose, at the time of starting the journey, the Traffic Management Center of the affected area shall be informed of the complementary authorization number or, failing this, the vehicle registration number, as well as the urgent service to be performed and the route to be followed from its origin to its destination.

– Agricultural machinery and machinery for works or services, provided that they do not require complementary authorization for circulation, shall be exempted from the restrictions contemplated in Annex V of this resolution.

– Special vehicles in roadside assistance service shall be exempt from the restrictions set forth in Annex II and Annex V of this resolution.

– Lifting cranes up to 5 axles (included) shall be exempted from the restrictions set forth in Annex V (section 2.º Specific restrictions, item B) of this resolution.

– In the case of accidents that require the urgent and immediate presence of automotive service machinery and lifting cranes at the site of the incident, they shall inform the Traffic Management Center of the affected area of the complementary authorization number or, failing that, the vehicle registration number, as well as the route they will follow from their origin to their destination.

C) Lanes reserved for certain types of vehicles:

C.1 Lanes reserved for the circulation of vehicles with high occupancy (VAO): They are considered as such:

– Those belonging to the central roadway of the A-6 highway in the Community of Madrid, between kilometers 6 to 20, when so provided by the variable access signage to the central roadway.

– The right lanes of both directions of the road of the province of Granada, GR-3211 [from Granada (A-395) to La Zubia], between kilometers 0.115 to 1.410 in increasing direction and between kilometers 0.105 to 1.530 in decreasing direction, when so provided by the existing signage.

– The lanes belonging to the roadway of the Puente de la Señorita between the towns of Seville and Camas in the province of Seville.

– Those belonging to the province of Malaga, to the right lane of the exit branch towards Campillos of the junction number 61 of the A-357 road and the right lane of the roadway towards the Parque Tecnológico de Andalucía (PTA) of the A-7056 road along its entire length, when so provided by the variable signaling.

– The left lane of the Ma-19 highway between kilometer points 2.600 and 6.500 in decreasing direction, access to the city of Palma (Mallorca-Illes Balears), when so provided by the existing signage.

– The left lanes in both directions of the A-2 highway in the province of Madrid, between kilometers 18.600 (Torrejón de Ardoz) and 4.300 (Madrid - connection with M-30).

in decreasing direction, and between kilometers 6.100 (Madrid-link with M-40) to 14.900 (Coslada/San Fernando de Henares) in increasing direction, when so provided by the existing signage.

– The left lanes of both directions of the V-21 highway in the province of Valencia, between kilometers 10.101 (Albuixech) to 16.470 (Alboraya) in increasing direction, and between kilometers 16.710 (Alboraya) to 10.390 (Albuixech) in decreasing direction, when so provided by the existing signage.

In all of them, the minimum number of occupants per vehicle shall be two, including the driver, and their use shall be limited to motorcycles with two or three wheels, passenger cars, buses with a maximum authorized mass exceeding 3,500 kilograms, articulated buses and adaptable mixed vehicles.

Consequently, its use by all other vehicles and vehicle combinations, including passenger cars with trailers, cycles and mopeds, is prohibited.

However, they may also be used, even if only the driver is occupying it, by:

- The aforementioned vehicles do display the V-15 sign.
 - For motorcycles with two or three wheels (motor tricycles with less than 600 millimeters of distance between wheels on the same axle).
 - For cars with V-25 environmental distinctive sign classified in the Vehicle Registry of the Autonomous Body of the Central Traffic Headquarters as "0 emissions".
 - For cars with a V-25 environmental sticker classified in the Vehicle Register of the Autonomous Body of the Central Traffic Headquarters as "ECO", "C" or "C", and for cars with a V-25 environmental sticker classified in the Vehicle Register of the Autonomous Body of the Central Traffic Headquarters as "ECO", "C" or "C".
- "B", only when this is indicated on the variable message panels for access to the VAO lanes. In all cases, vehicles shall be identified by the sticker that has been configured for this purpose, placed in the lower right corner of the windshield -or in the absence of this, in a visible place-.

The models of the V-25 environmental stickers, and the characteristics of the vehicles included in the "0 emissions" classification, "ECO", "C" and "B" are defined in Annexes II and XI of the General Vehicle Regulations.

- For buses with a maximum authorized mass exceeding 3,500 kilograms and articulated buses.
- For vehicles classified as cabs according to the criteria of use of Annex II of the General Vehicle Regulations, which have an exterior light module and a valid autotaxi license, as well as a circulation permit for public service A-04 Taxi.

C.2 Lane reserved for the circulation of vehicles destined for public passenger service:

It has such consideration:

- The lane belonging to the left lane of the A-8065 road in the province of Seville, from San Juan de Aznalfarache to Seville.

It can only be used by vehicles bearing the V-9 sign.

Motorcycles with two or three wheels (motor tricycles with a distance of less than 600 millimeters between wheels on the same axle) and mopeds may also circulate.

D) Other regulatory measures in exceptional circumstances:

In order to achieve a better flow of traffic, in exceptional situations, the Autonomous Body of the Central Traffic Headquarters, or in its case, the Traffic Police Agents, will

Authority responsible for the surveillance and discipline of traffic, shall adopt the appropriate traffic regulation measures, among them:

D.1 Regulatory measures in exceptional circumstances:

D.1.1 Due to adverse meteorological phenomena:

In the event of adverse weather conditions, the circulation of certain types of vehicles may be restricted, without prejudice to the obligation incumbent upon drivers of trucks with a maximum authorized mass (MMA) exceeding 3,500 kg, buses, articulated buses and vehicle combinations, to drive on the right lane of the road, and not to overtake or pass in the event of snow, ice, low visibility due to fog or strong wind.

D.1.2 High concentration of vehicles:

Due to high concentration of vehicles in certain places of special protection, road capacity limitations, sporting events and other events, which are specified in Annex VIII of this resolution, exceptional regulation measures may be established, which will be adequately signposted on the road and will be published on the website of the Directorate General of Traffic at least one month in advance.

Annex VIII referred to in the preceding paragraph may be extended in the same cases by resolution of the Provincial Traffic Chief of the corresponding province and published on the website of the Directorate General of Traffic, when circumstances so advise for reasons of safety or traffic flow that require special traffic regulations.

D.2 Improvement of road safety in sections with a high accident rate:

D.2.1 By vehicle characteristics and road sections:

In order to guarantee road safety, mobility and traffic flow, as well as due to the intrinsic danger of the load of certain vehicles, it is necessary to dictate restrictive measures affecting the circulation of certain vehicles or groups of vehicles transporting goods on the stretches of roads listed in Annex VII of this resolution, with the aim of reducing the accident rate and improving road safety for all users of the stretches in question.

For this reason, on a temporary basis until future specific actions can guarantee road safety for users, the proportion of heavy vehicles circulating on these sections is reduced, taking into account that there are alternative routes that should be used by vehicles affected by this restriction, as they have better route characteristics and greater capacity.

D.2.2 Exemptions:

The following are exempted from this restriction:

- Vehicles or groups of vehicles in which the origin or destination of the goods they are transporting, according to the waybill or equivalent documentation on board, are located in localities that can only be accessed from the restricted sections, in the duly justified minimum essential route.
- Vehicles dedicated to the roadside assistance service that are in service.
- Vehicles or groups of vehicles with special authorization to circulate due to their indivisible load or their constructive characteristics, when their itinerary includes totally or partially the section affected by the restriction.

– The trips within the restricted section, in the minimum essential route, necessarily returning by the same itinerary and with due justification: when the destination or origin is the habitual residence of the driver or the place of domiciliation of the vehicle; when the daily or weekly rest or mandatory break is to be carried out; when repair or maintenance operations are to be performed on the vehicle, or in cases of provisioning or supplying.

– In exceptional, emergency or public service situations, the Authority Agents responsible for traffic surveillance and discipline may allow the circulation of vehicles subject to the aforementioned restriction.

E) Restrictions on roads with high bicycle traffic:

In order to increase road safety and favor the coexistence of the different types of vehicles suitable for circulation on public roads, and taking into account the special vulnerability of cyclists compared to other motor vehicles with larger masses and dimensions, the Autonomous Body of the Central Traffic Headquarters may establish, during specific days and time periods, temporary speed limits on sections of interurban roads that are determined to have a high number of cyclists.

Speed limitations shall be signaled by the Autonomous Body of the Central Traffic Headquarters, by means of the corresponding variable signage, or by the body owning the road, by means of fixed signage indicating the full scope of the limitation.

The website of the Dirección General de Tráfico will provide information on the road sections affected by these limitations.

F) Restrictions on the execution of road works:

Due to the special circumstances or characteristics of traffic, during the Traffic Operations calendar on the occasion of the massive displacements of vehicles foreseen during the year 2024, and with the purpose of improving road safety and traffic flow, the Autonomous Body of the Central Traffic Headquarters will request, in any case, the bodies owning the affected roads, to carry out the interruption of the works under the terms foreseen in Annex VI.

However, for justified reasons, the bodies owning the roads may exceptionally authorize, after notifying the Autonomous Body Jefatura Central de Tráfico, through the Traffic Management Center of the affected area, the performance of works on the dates and roads listed in Annex VI.

G) Prohibition on overtaking transport vehicles on certain stretches of road:

In order to increase road safety and promote traffic flow, the Autonomous Body of the Central Traffic Headquarters may establish, during specific days and time periods, the prohibition of overtaking vehicles over 7,500 kg of MMA, vehicles requiring additional authorization and special vehicles, on the dates and roads listed in Annex V, section 3 of this resolution.

In this regard, this prohibition on overtaking may be established on certain road sections for transport vehicles, other roads and sections other than those indicated in the aforementioned Annex V, section 3, as required by road safety and traffic flow conditions.

Overtaking prohibitions shall be signaled by the Autonomous Body of the Central Traffic Headquarters, by means of the corresponding variable signage, or by the body owning the road, by means of fixed signage indicating the full scope of the overtaking prohibition.

H) Enabling lanes in the opposite direction to the usual on certain stretches of road:

For reasons of traffic flow on road sections susceptible to high traffic intensities and traffic jams, and in accordance with Article 41 of the General Traffic Regulations, approved by Royal Decree 1428/2003, of November 21, 2003, lanes may be provided in the opposite direction to the usual on certain road sections to increase their road capacity. However, according to traffic demand, these lanes may be provided in the opposite direction to the usual on different stretches of roads to those indicated in Annex V, section 4 of this resolution.

Second. Penalty regime.

Failure to comply with the measures contemplated in this resolution that are considered an infraction in accordance with the provisions of the revised text of the Law on Traffic, Circulation of Motor Vehicles and Road Safety, shall be sanctioned in the manner provided for in the aforementioned regulation.

The agents of the Authority in charge of traffic management may proceed, if the person obliged to do so does not do so, to remove the vehicle from the road and deposit it in a designated place, provided that it constitutes a danger or causes serious disturbances to the circulation of vehicles or pedestrians, in accordance with the provisions of article 105 of the revised text of the Law on Traffic, Circulation of Motor Vehicles and Road Safety.

Third. Exceptional case of lifting of restrictions.

Exceptionally, the Autonomous Body of the Central Traffic Headquarters, depending on the conditions under which the traffic is being developed, may allow the circulation during the periods and to the vehicles affected by the restrictions established in this resolution, for which purpose it shall give the appropriate instructions to the Traffic Grouping of the Civil Guard and the appropriate dissemination of the measure.

Sole final provision. Entry into force and period of validity.

This resolution will enter into force eight working days after its publication in the "Official State Gazette". It will be in force during the year 2024, being extended until the date of entry into force of the resolution establishing the special traffic regulation measures for the year 2025, with the exception of the restrictions for specific dates determined in Annexes I, II, V, VI and VIII of the present document.

Madrid, January 24, 2024 -The Director General of Traffic, Pere Navarro Olivella.
